## *Quality Assurance Analyst*

We're Investors Group – a Canadian leader in providing personal financial planning services, and dedicated to building lasting client relationships. This is your opportunity to build a career with a leading organization where you can learn, grow and thrive both professionally and personally.

**Our vision is to be the best financial services company serving the long term needs of individual Canadians.**

### **At Investors Group:**

- We relate to our diverse clients through **Comprehensive Planning**.
- In all of our endeavors we are **Diligent In Our Efforts**.
- We respect each other and the communities we serve by being **People Who Care**.

If you share our vision and values, we'd like to hear from you.

We are currently looking for a **Quality Assurance Analyst** to join our Information Services (I.S.) division in our Winnipeg location. The successful candidate will be associated with the Quality Assurance Career Centre.

The QA Analyst is responsible for planning, designing, recording, executing and analyzing results for functional and non-functional test activities. Working closely with Systems Analysts, Software Developers, Technical architects and the QA Test Leads, the QA Analyst will play a key role in diagnosing application and system problems by developing comprehensive test plans and executing on them.

### **Duties Include:**

- Conduct Functional/Integration, Non-Functional & Regression Testing
- Participate in Requirements/Specification Walkthroughs
- Provide QA Estimates on testing initiatives
- Create Test Scenarios/Test Cases/Test Conditions for Functional/Integration, Non-functional & Regression tests
- Conduct Test Case review and ranking sessions
- Identify Test Data requirements
- Execute test cases
- Analyze, log and track defects, providing test progress reporting to Test Lead, and escalation of issues to Test Lead.
- Assist the Business in User Acceptance Test Planning and obtain Business User approval of test results
- Provide post implementation verification and warranty support as requested
- Perform tasks as assigned by the Test Lead

### **Qualifications**

- 5+ years experience in a functional testing role with strong understanding of web technologies and proven ability to design detailed test cases applying both business and technical requirements, preferably using financial systems.
  - Strong understanding of the different phases of the Software Development Life Cycle and Testing Methodologies
  - Strong analytical and problem solving skills
  - Strong understanding of schemas, data structures and mappings
  - Excellent written and verbal communication skills and the ability to work with both business and technology teams
  - Proven ability to work in a team environment
  - Strong ability to multi-task and balance project work
  - Proficiency with Microsoft Windows, MS Excel, Rational Tools, Oracle
