

Software Developer

We're Investors Group – a Canadian leader in providing personal financial planning services, and dedicated to building lasting client relationships. This is your opportunity to build a career with a leading organization where you can learn, grow and thrive both professionally and personally.

Our vision is to be the best financial services company serving the long term needs of individual Canadians.

At Investors Group:

- We relate to our diverse clients through **Comprehensive Planning**.
- In all of our endeavors we are **Diligent in Our Efforts**.
- We respect each other and the communities we serve by being **People Who Care**.

If you share our vision and values, we'd like to hear from you.

We are currently looking for a **Software Developer** to join our Information Services (I.S.) division **in our Winnipeg location**. The successful candidate will be associated with the Software Development Career Centre.

The Software Developer will design, develop and implement software solutions to meet our business objectives. They are a leader in software development best practices, SOA, and OO design concepts. They are able to design software solutions across a variety of platforms and work effectively as a member of a larger, multi-disciplinary team. They have outstanding problem solving abilities and can communicate their ideas easily to others. They have proven leadership abilities and a desire to be a lead on large web project teams.

DUTIES INCLUDE:

- Design, build, test and implement software solutions
- Perform application analysis
- Provide estimates for software development work
- Provide consultation to Systems Analyst and Systems Architect
- Provide consultation to Manager, Career Centre in development of SD practices
- Provide leadership to software development web team.

QUALIFICATIONS:

- Minimum of 3-5 years in Java/Web development experience
- Post secondary relevant degree/diploma (Computer Science, Computer Analyst/Programmer or equivalent)
- Experience with web development tools including (Java, C++), and understanding of database concepts and SQL are required
- Web service development using web service frameworks
- Application development on WAS, WPS, and Tomcat
- Creative and possess strong problem-solving and communication skills
- Good interpersonal skills with the ability to work with and lead a team of software developers
